---

Mohamed (Mo) Abuali is the Founder and CEO of IoTco, the premier provider of Industrial Internet of Things (IIoT) software and services. Mohamed brings over 20 years of manufacturing technology experience in digital transformation and predictive maintenance and analytics, with in-depth knowledge of delivering productivity improvements in Automotive, Aerospace & Defense, Medical Devices, and Oil & Gas manufacturers.

Prior to forming IoTco, Mohamed led and grew FORCAM operations in the Americas, a global provider of MES software for manufacturing. He started his career working for IBM followed by the National Science Foundation (NSF) Center for Intelligent Maintenance Systems (IMS) at the University of Cincinnati, a recognized international leader in Predictive Analytics and Industrial Big Data.

Mohamed holds a PhD in Industrial Engineering specializing in Predictive Maintenance from the University of Cincinnati, and a Bachelor's in Systems Engineering from the University of Arizona.
